WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

April 7, 2026

Potential Flood Risk

Hawaii

- A third Kona storm in three weeks will bring drenching rain, flooding and mudslide risks to Hawaii.
- As the storm unfolds, it will draw tropical moisture northward across the islands, bringing occasional drenching showers and thunderstorms to areas that are typically sheltered from rain due to persistent northeast trade winds.
- The first phase of the new storm will bring an uptick in showers and thunderstorms from Tuesday night to Thursday.
- Rainfall totals may be similar to the second Kona storm that affected the islands from March 19-22. That storm brought 3-4 inches of rain to the Honolulu area.
- "While there has been a bit more of a gap since the storm that wrapped up on March 21, the ground is still wet, and runoff from the new storm will be swift," said AccuWeather Senior Meteorologist Brett Anderson.
- The main impacts from the Kona storm will likely unfold beginning Thursday night.
- Streams and reservoirs are likely to rise quickly. Saturated ground, a new round of heavy rain and increasing water pressure could raise the risk of levee failure.
- A flood watch has been issued for all Hawaiian Islands from Wednesday morning through Friday afternoon due to the flash flooding caused by possible excessive rainfall.

Pending Individual Assistance Declaration Requests

State	Event	Date Submitted	Approved/Denied/Pending	Number of Counties/Tribes
IL*	Severe Storms and Flooding July 25 - 28, 2025 (Appeal)	11/21/2025	Pending	3 Counties
WA	Severe Storms, Straight-line Winds, Flooding, Landslides/Mudslides. Dec 5-22, 2025	1/21/2026	Pending	10 Counties
