WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 11, 2025

Flash Flood Threat

Texas

- The risk of heavy rainfall and severe weather is expected to return to the Lone Star State over the weekend.
- Worst of the storms are expected to pass north of the areas recently devastated by July Fourth's historic and deadly flooding.
- Given the already saturated and highly vulnerable landscape across the Texas Hill Country, the FOX Forecast Center warned that people in the area should remain especially alert for any storms that develop in the region.
- Thunderstorm complexes are forecast to develop Saturday afternoon over parts of the Texas Panhandle, Big Bend and North Texas.
- The storms are expected to bring flash flooding, hail and damaging wind gusts, with cities such as Amarillo, Lubbock, Midland, Abilene and Dallas.
- NOAA's Weather Prediction Center has issued a flash flood threat that covers most of west Texas, the Panhandle and North Texas.
- Model guidance suggests some locations could receive as much as 2-4 inches of rain, though the heaviest precipitation is expected to remain north of the hard-hit Hill Country.

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/Pending	Number of Counties/Tribes
MI*	Severe Winter Storm	5/16/2025	Pending	11 Counties
