WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

August 4, 2023

Severe Weather Outlook

- The FOX Forecast Center is tracking a potent storm system that has the potential of producing rounds of showers and thunderstorms across most of the northern tier of the country over the weekend and during the start of the upcoming workweek.
- The combination of a southerly flow and moist, unstable air will lead to rounds of rains kicking off ahead of an eastward-advancing cold front.
- The rains are expected to begin on Saturday across the Plains and work eastward with each subsequent day.
- Over the system's trek across the northern tier of the country, nearly 80 million Americans will find themselves under a heightened thunderstorm risk.
- The first day of the event could produce severe weather across Kansas, Nebraska, Iowa and Missouri.
- Communities that are closer to the surface low may see an increased tornadic threat, but hail and damaging wind gusts appear to be the primary hazards.
- Wichita, Kansas; Kansas City, Missouri; and Lincoln, Nebraska, are included in the heightened risk zone.
- The potent storm system is expected to continue to strengthen as it treks eastward across the Midwest on Sunday.
- The SPC has highlighted communities from southern Wisconsin to Kentucky for seeing the highest risk of severe storms.
- Forecasters warn all severe weather hazards will be possible, but damaging wind gusts and heavy rainfall will be the primary concerns.
- Chicago, Indianapolis and Cincinnati are all included in the heightened threat zone as storms work from west to east across the region.
- Showers and thunderstorms are expected to push out of the Ohio Valley and into communities along the Appalachians and Northeast to start the workweek.

WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

August 4, 2023

Declaration Request Pennsylvania

- On July 9, 2023, record rainfall caused creeks to quickly swell over their banks in several areas across Berks County.
- Flash flooding made roads impassable for hours in many areas, most notably in Muhlenberg Township, Maiden creek Township, Oley and Lower Alsace Township.
- First responders were kept very busy with calls for water rescues from submerged vehicles and homes threatened by high water.
- In Lower Alsace Township, high water from Antietam Creek lead to the collapse of a building, flooded dozens of homes and caused damage to Antietam Middle Senior High School.
- Further down the creek in Exeter Township, multiple residents were evacuated from the Penn View Mobile Home Park.
- On July 31st, Governor of Pennsylvania requested a major disaster declaration. He is requesting individual and public assistance for Berks County.
