WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

January 5, 2026

Flooding Activity Northern California

- After weeks of unusually heavy rain, California continues to face an unusually wet winter.
- The latest flooding for the state has arrived in Northern California, where a rare combination of king tides and heavy rains have flooded streets.
- King tides occur when the sun, moon and Earth are aligned and the moon is in its closest position to the Earth, creating a stronger gravitational pull.
- With record-breaking tides around the Bay Area, high water prompted road closures and flooded neighborhoods most notably in Marin County.
- Roadways through a 15-mile stretch from the Sausalito area to San Rafael were flooded, and authorities were called to rescue drivers who got stuck in water as high as 3 and 4 feet.
- To the south in Santa Barbara County, roads were closed due to flooding and a key highway was blocked near Goleta due to a series of mudslides.
- Rainy weather is expected to continue for much of coastal and Northern California through Monday night, as a series of storms continue to hit the state.
- Beyond Monday, the storm track is expected to shift north, bringing more rain and mountain snow to the Pacific Northwest.

Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
WA	Severe Storms Dec 5 and continuing	12	0	12/15 - TBD

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
