WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

November 4, 2025

## 2025 Hurricane Season

- So far this year, we've had 13 named storms in the Atlantic, with 5 hurricanes and 4 major hurricanes (Category 3+).
- Three out of the 4 major hurricanes reached Category 5 strength (Erin, Humberto, Melissa).
- The hurricane season is 95% complete, but there still have been some big November storms in the past years.
- Since 1850, 135 tropical storms have been tracked during the month. Approximately 75 of those formed on or after Nov. 1. Most stay away from the United States coast, but not all.
- Hurricane Nicole made landfall as a Category 1 storm south of Cape Canaveral, Florida, on Nov. 10, 2022. The storm exacerbated damage from Hurricane Ian, which hit east-central Florida just six weeks earlier.
- Ida (November 4-14, 2009) made landfall as a Category 1 storm on the east coast of Nicaragua before ejecting back into the Caribbean Sea and traveling north into the Gulf, strengthening back into a hurricane. Ida then made landfall as an extra-tropical storm near Dauphin Island, Alabama.
- Kate (November 15-23, 1985) impacted several Caribbean Islands as a hurricane before steering into the Gulf. Kate made landfall as a Category 2 hurricane along the Florida Panhandle.
- Hurricane season officially runs until November 30<sup>th</sup>.
