WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 19, 2024

## March 12-15 Severe Weather Outbreak

- During the outbreak, which spanned March 12-15, there were more than 600 filtered reports of severe weather, making it the biggest outbreak of the year so far.
- Before this past week, the severe weather outbreak from Feb. 27-28 brought just over 200 filtered reports of severe weather, including 26 tornadoes and about 50 reports of severe hail.
- The number of hail reports of 1 inch or more in diameter from March 12-15 was more than 370.
- During the three-day severe weather event, there were at least 23 confirmed tornadoes.
- Of these twisters, the strongest storm, the Selma-Winchester, Indiana, tornado, has been rated at least EF-3 strength and was responsible for more than three dozen injuries and total destruction in some areas on Thursday.
- A tornado rated as EF-3 strength also tore a path through Indian Lake, Ohio, on Thursday evening and has taken the lives of three people with more than a dozen injuries.
