WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

October 22, 2025

Tropical Activity

Tropical Storm Melissa

- Tropical Storm Melissa formed late Tuesday morning, and forecasters say it could strengthen into a hurricane over the weekend.
- Winds within Tropical Storm Melissa have held steady at 50 mph, but the storm is expected to continue slowly strengthening.
- Forecasters say it will likely become a hurricane, and it could even strengthen into a Category 2 hurricane in the coming days.
- Located about 300 miles to the south-southwest of Port-au-Prince, Haiti, and is moving off to the west-northwest at 7 mph.
- A decrease in forward speed and a gradual turn to the northwest and then north-northwest is expected over the next few days.
- Tropical Storm Melissa is expected to approach Jamaica and the southwestern portions of Haiti later this week.
- The NHC said 5-10 inches of rain, with locally higher amounts, could fall in southern areas of the Dominican Republic, southern Haiti and eastern Jamaica through Saturday.
