WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

October 25, 2023

Tropical Activity

Atlantic – Hurricane Tammy (CAT 2)

- Hurricane Tammy has strengthened into a Category 2 hurricane as it continues to spin over the open waters of the Atlantic Ocean on a path that could eventually bring tropical storm conditions to Bermuda this weekend.
- Tammy is located about 540 miles to the south-southeast of Bermuda and has maximum sustained winds of 100 mph.
- The NHC says Tammy could see some slight strengthening on Wednesday, followed by weakening through the rest of the week and is expected to become a powerful post-tropical cyclone by Thursday.
- A northward turn is expected later on Wednesday, followed by a slower motion to the northwest on Thursday and Friday.
- Even though Tammy is hundreds of miles away from the Caribbean islands, the storm is still producing large waves that are impacting portions of the Leeward Islands, the U.S. and British Virgin Islands and Puerto Rico.
- Those swells are continuing to cause life-threatening surf and rip currents.

Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
MA	Flooding Sep 11-13	2	0	10/10-TBD

Pending Individual Assistance Declaration Request
