WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

April 27, 2023

Severe Weather Outlook

- Residents in the Southeast will once again be on alert for severe weather Thursday as severe storms target the area.
- On Thursday, more than 30 million Americans across eight states will be at risk of severe weather.
- "Damaging gusts, large hail, and a few tornadoes will all be possible," the National Weather Service said.
- The activity centers around the Gulf of Mexico where a storm system with a marginal or slight risk of severe weather is forecast to hit Texas, the greatest impact will be in the Corpus Christi area.
- Large hail, damaging wind gusts and tornadoes are again possible today across the southern U.S., with South Texas, the central Gulf Coast and portions of Florida facing the highest risk of severe storms.
