WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

October 5, 2023

## Tropical Activity

### Atlantic – Tropical Storm Philippe

- By the time Philippe aims for northern New England and Atlantic Canada, the weather setup will be complex. Philippe’s rain may become intermingled with two other systems over parts of the Northeast.
- Tropical Storm Philippe continues to fight adverse atmospheric conditions as it begins to trek north of the Caribbean.
- AccuWeather meteorologists, who have been tracking Philippe since mid-September - days before an organized system developed - say the storm will travel nearly 2,000 miles to the north, where it could strike Maine with heavy rain, strong winds and storm surge this weekend.
- As Philippe moves northward and away from the Caribbean, impacts will soon be felt in Bermuda. As Philippe churns forward, impacts will be felt in Atlantic Canada and New England as a complex weather pattern unfolds this weekend.
- Much of the data suggests that Philippe is most likely to head near the Maine and New Brunswick border late Saturday night to Sunday morning, perhaps passing near the southwestern tip of Nova Scotia.
- That track, which could jog even farther to the west, will depend on multiple factors. A surge of cool air across the Northeast and the formation of a second storm between Philippe and the East Coast of the United States will both come into play.

## Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
PA	Flooding Sep 9-10	1	0	10/2-TBD
MA	Flooding Sep 11-13	2	0	TBD
