WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 30, 2026

Severe Weather Outlook Upper Midwest

- More than 25 million people across the Upper Midwest are at risk of severe thunderstorms Monday, with a stormy weather pattern expected to dominate parts of the Central U.S. at least through the first half of April.
- Severe storms are expected across the Upper Midwest beginning Monday before shifting over the Great Lakes on Tuesday, with more storms developing across the Southern Plains and Mid-Mississippi Valley by Wednesday.
- An area of low pressure will move through parts of the Northern Plains, sparking a threat of severe storms for parts of Iowa, Wisconsin, Michigan, as well as northern Indiana and northern Illinois, including Chicago.
- The FOX Forecast Center said hail will be the primary threat, though an isolated tornado cannot be ruled out despite a lower overall tornado risk.
- NOAA's Storm Prediction Center has issued a Level 2 out of 5 risk of severe thunderstorms for northeastern Iowa, southern Wisconsin, including Madison, and parts of northern Illinois.
- Storms are expected to develop and become stronger later in the evening, likely after 6 or 7 p.m. CT, before reaching southern Michigan early Tuesday.
- As that airmass moves in, rain and thunderstorms will become more widespread, increasing the risk for flash flooding, with the greatest concern near the eastern Great Lakes, where a deep snowpack remains.

Joint Preliminary Damage Assessments
