WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

August 21, 2025

## Tropical Activity

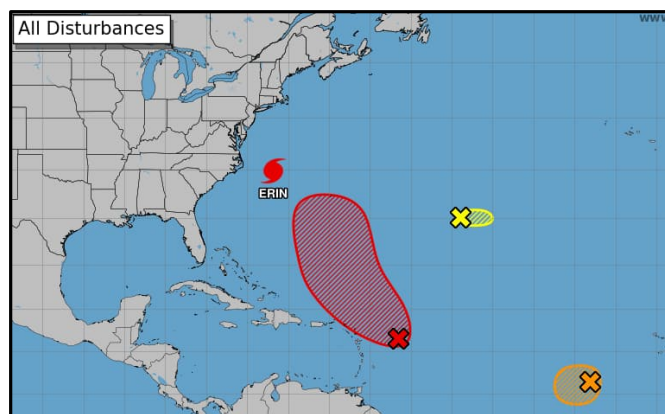

### Atlantic - Hurricane Erin (Cat 2)

- A powerful and sprawling Hurricane Erin continued lashing hundreds of miles of coastline along the Eastern Seaboard with its outer bands Thursday morning.
- Tens of thousands had been evacuated off the most vulnerable of North Carolina's Outer Banks as a storm surge of up to 4 feet was likely.
- The center of Erin and its peak winds were some 200 miles east of Cape Hatteras, North Carolina, tropical-storm-force winds extended outward up to 320 miles, reaching parts of the North Carolina and Virginia coastlines, where Tropical Storm Warnings lingered into Thursday.
- Hurricane Erin's path was pulling farther away from the mid-Atlantic coast on Thursday as it headed out toward the open waters of the North Atlantic.
- By late Friday, Erin will be racing out into the far North Atlantic, eventually losing its hurricane status.

### Atlantic – Disturbance 1

- A tropical wave located a few hundred miles east of the Leeward Islands has changed little over the past several hours.
- Environmental conditions appear conducive for further development of this system.
- A tropical depression is likely to form this week-end while it moves near or to the north of the northern Leeward Islands.
- Formation chance – 48-hour: Med (40%); 7-day: High (70%)

### Atlantic – Disturbance 2

- Located several hundred miles west-southwest of the Cabo Verde Islands show some signs of organization.
- Environmental conditions appear marginally favorable for additional development over the next day or so as it moves west-southwestward at around 15 mph.
- In a couple of days, environmental conditions are expected to become unfavorable for further development.
- Formation chance – 48-hour: Med (40%); 7-day: Med (40%)

## Atlantic – Disturbance 3

- An area of low pressure located about 1200 miles southwest of the Azores is producing limited showers and thunderstorms.
- Upper-level winds are only marginally conducive for development while the system moves slowly eastward over the next couple of days
- Formation chance – 48-hour: Low (30%); 7-day: Low (30%)

## Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
	N/A			

## Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
WI	Severe Weather & Flooding Aug 10 – 12	3	0	8/19 - TBD
