WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 26, 2021

## Tropical Activity

### Atlantic – Disturbance 1

- While the chance for further tropical development is decreasing as a tropical disturbance approaches land early this week, AccuWeather meteorologists caution that soggy weather is still on the horizon for the southeastern United States.
- Due to this tropical disturbance, there will still be increased shower and thunderstorm coverage through Tuesday across portions of Florida and Georgia.
- AccuWeather forecasters have lowered the risk of tropical depression and storm formation off the Atlantic coast of Florida to about 30% as of the early Monday morning.
- Steering breezes are forecast to push the center of the weak circulation onshore early Monday over northeastern Florida. Once the center moves inland the risk will substantially fall off.
- It appears that northerly wind shear will transition to easterly wind shear into Monday.
- "This change in steering breezes and wind shear will tend to bring more moist air in across Florida, as well as southeastern Georgia and coastal South Carolina on Monday and Tuesday, and that will bring an uptick in shower and thunderstorm activity regardless of any tropical development," AccuWeather Senior Meteorologist Dan Pydynowski said.
- Some of the storms can be robust even by southern U.S. standards, with strong wind gusts and torrential downpours that can lead to flash flooding.
- There is also the potential for a few waterspouts to be spawned, as well as a couple of tornadoes over the Florida Peninsula and southeastern Georgia.
- Even though the circulation of the disturbance has been weak thus far, it is forecast to generate some rough seas and surf over waters along and off the southern Atlantic coast into Tuesday.

## WSP USA Inspection Services Active Disasters

Disaster Number and State	Disaster Type	Number of Counties Declared	Days Since Launch	Registration Deadline
4586 TX	Severe Ice Storm	129 Counties	154	5/20/2021
4595 KY	Severe Storms & Flooding	31 Counties	86	7/23/2021
4607 MI	Severe Storms & Flooding	2 Counties	6	9/13/2021
