WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

June 17, 2025

## Severe Weather Outlook

### Central Plains

- Millions of people in the central U.S. are bracing for another potentially dangerous day of severe weather on Tuesday, one day after tornadoes blasted across portions of Minnesota and Nebraska in the Midwest.
- Severe weather started off early Tuesday morning when severe thunderstorms plowed across Kansas, where a record 101-mph wind gust was reported in Wichita.
- More severe weather is expected throughout the day on Tuesday across portions of the central Plains and into the Missouri Valley, which is farther south than where the storms were on Monday.
- The FOX Forecast Center said a cold front will continue to plow across the region, and warm, humid air out ahead of it will help to fuel the development of thunderstorms.
- Early on, a few isolated storms could grow strong enough to produce giant hail. As the day progresses, storms may group together into a line, increasing the threat for extreme wind gusts.

## Flooding Activity

### West Virginia

- Cleanup and recovery efforts are underway in Ohio and Marion counties in West Virginia after deadly flash floods killed at least seven people over the weekend.
- The death toll rose to seven Tuesday morning, and a search is ongoing for two people who remain missing.
- A quick burst of 3 to 5 inches of rain soaked the mountainous area near Wheeling and caused Wheeling Creek to rise nearly 7 feet to flood stage within just a few hours, according to the FOX Forecast Center.
- Ohio County officials said more than 20 vehicles had to be removed from the creek Monday.
- Significant flooding was also reported in the town of Triadelphia, where five of the victims lived, as well as the village of Valley Grove.
- Governor Morrisey declared a state of emergency on June 15<sup>th</sup> in Ohio County and Marion counties.
- The FOX Forecast Center said more rain will continue to fall across the flooded area through midweek.
- A Level 3 out of 4 flash flood threat has been issued by NOAA's Weather Prediction Center, which covers the flood-ravaged city of Wheeling, West Virginia, through Wednesday morning.
