WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

December 10, 2025

Flooding Activity Northwest

- A powerful atmospheric river has delivered bouts of serious rain, soaking the Pacific Northwest, triggering major river flooding.
- Footage captured major river flooding near Fall City, Washington stemming from the Snoqualmie River, located just east of Seattle.
- The Snoqualmie River crested the highest it's been at Snoqualmie Falls in 10 years, with a flow rate of 45,000 cubic feet per second, at 17.8 feet.
- The powerful atmospheric river will continue to slam the region through the middle of the week.
- Through Thursday, localized amounts of 3-5 inches are possible as downpours continue to soak the region.
- Several rivers, including the Cowlitz River near Randle, Washington, and the Snoqualmie River at Carnation, Washington are at major flood stage as of late Tuesday.
- Due to very saturated ground and ongoing rainfall into Wednesday, the risk of flash flooding remains at a level 2/4 through Thursday morning for cities such as Seattle, Portland, and Eugene, Oregon.
- Flood watches also continue across northwest Washington as a widespread 2–3 inches of additional rain is still likely for coastal Washington and Oregon through Friday.

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
IL*	Severe Storms and Flooding July 25 - 28, 2025 (Appeal)	11/21/2025	Pending	3 Counties
