WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

April 10, 2023

2023 Tornado Season

- The last few weeks have consisted of a steady string of violent storms, dozens of deaths and entire towns left in ruins.
- There have been 494 tornado reports so far in 2023 – nearly double the average at this point in the year.
- Many of these storms have occurred outside “Tornado Alley,” which includes states across the Plains, but instead have carved miles of destruction across the Southeast and Midwest.
- There have already been more than 60 fatalities from severe storms in just over three months into 2023. This number is staggering, considering the average number of tornado deaths we see in an entire year is 71.
- One reason this year has been so deadly is because many of these storms have swept through at night.
- With nearly 500 tornadoes so far in 2023, it makes it the third-highest tornado year behind 2008 and 2017, year-to-date. And 13 of the 15 weeks this year have brought severe weather.
- As the United States heads deeper into peak tornado season, the next week to 10 days should feature a quieter weather pattern. After that, the raging thunderstorms of spring may return.

Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
GA	Severe Storms Mar 24-25	2	0	4/4-TBD
AL	Severe Storms Mar 24-25	4	0	TBD
